Values are estimated and may vary. The performance score is based only on these metrics.

Opportunities — These suggestions can help your page load faster. They don't directly affect the Performance score.

Opportunity

Estimated Savings

▲ Reduce server response times (TTFB)

15.07

s

▲ Eliminate render-blocking resources

1.28 s

Diagnostics — More information about the performance of your application. These numbers don't directly affect the Performance score.

Serve static assets with an efficient cache policy — 5 resources found

Avoid chaining critical requests — 7 chains found

User Timing marks and measures — 8 user timings

Keep request counts low and transfer sizes small — 18 requests • 305 KB

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Contrast — These are opportunities to improve the legibility of your content.

▲ Background and foreground colors do not have a sufficient contrast ratio. ▼

Internationalization and localization — These are opportunities to improve the interpretation of your content by users in different locales.

▲ `<html>` element does not have a `[lang]` attribute ▼

Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

▲ Links do not have a discernible name ▼

Navigation — These are opportunities to improve keyboard navigation in your application.

▲ Some elements have a `[tabindex]` value greater than 0 ▼

Additional items to manually check (11) — These items address areas which an automated testing tool cannot cover. ▼
Learn more in our guide on [conducting an accessibility review](#).

Passed audits (16) ▼

Not applicable (15) ▼

Best Practices

▲ Does not use HTTPS — 1 insecure request found ▼

▲ Does not use HTTP/2 for all of its resources — 5 requests not served via HTTP/2 ▼

- ▲ Does not use passive listeners to improve scrolling performance
 - ▲ Links to cross-origin destinations are unsafe
- Passed audits (11)

SEO

These checks ensure that your page is optimized for search engine results ranking. There are additional factors Lighthouse does not check that may affect your search ranking. [Learn more](#).

Content Best Practices — Format your HTML in a way that enables crawlers to better understand your app's content.

- ▲ Document does not have a meta description

Mobile Friendly — Make sure your pages are mobile friendly so users don't have to pinch or zoom in order to read the content pages. [Learn more](#).

- Tap targets are not sized appropriately — 92% appropriately sized tap targets

Additional items to manually check (1) — Run these additional validators on your site to check additional SEO best practices.

Passed audits (11)

Progressive Web App

These checks validate the aspects of a Progressive Web App. [Learn more](#).

Fast and reliable

Page load is fast enough on mobile networks

- ▲ Current page does not respond with a 200 when offline
- ▲ start_url does not respond with a 200 when offline No usable web app manifest found on page.

Installable

- ▲ Does not use HTTPS — 1 insecure request found

▲ Does not register a service worker that controls page and <code>start_url</code>	▼
▲ Web app manifest does not meet the installability requirements Failures: No manifest was fetched.	▼
PWA Optimized	
▲ Does not redirect HTTP traffic to HTTPS	▼
▲ Is not configured for a custom splash screen Failures: No manifest was fetched.	▼
Does not set a theme color for the address bar.	▼
▲ Failures: No manifest was fetched, No <code><meta name="theme-color"></code> tag found.	▼
Content is sized correctly for the viewport	▼
Has a <code><meta name="viewport"></code> tag with width or initial-scale	▼
Contains some content when JavaScript is not available	▼
▲ Does not provide a valid <code>apple-touch-icon</code>	▼

Additional items to manually check (3) — These checks are required by the baseline [PWA Checklist](#) but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.

Runtime Settings
